

Stiff Arms™ – Ladder Stiffener System

Leverage Design Holding, LLC

- A new patent pending extension ladder safety accessory
- Removes dangerous ladder motion, sway and bounce
- Attaches quickly to all extension ladders (no tools required)
- Creates a solid climbing platform to improve user safety, comfort and confidence
- Increases ladder stiffness by factor of 4
- Splayed truss arms provide simultaneous stiffening in orthogonal and lateral directions
- Kits include:
 - Sturdy telescoping aluminum arms
 - Molded quick-connect arm clamps
 - Molded low friction cable guides
 - High tensile 4mm 7x19 wire cable
 - Stainless steel cable anchors & clamps
 - Molded rail-mounted cable brackets
- Kits available for ladders from 20 ft. up to 48 ft.
- Arms collapse to compact size for convenient storage
